ACADEMIC PROJECTS:

- ❖ Project Name : Reversible data hiding in Encrypted Image
- ❖ Project Domain : Network Security
- ❖ Time Duration : Six months
- ❖ Project Role : Worked as a Team Leader and I am responsible for some part of Coding and Database work
- ❖ Technology : MySql database
- ❖ Operating System : Windows 10
- ❖ Description : This project is a novel scheme of reversible data hiding in encrypted images using distributed source coding (DSC). The original image is encrypted by the content owner using a stream cipher and data-hider compresses a series of selected bits taken from the encrypted image to make room for the secret data. On the receiver side, the secret bits can be extracted if the image receiver has the embedding key only. In case the receiver has the encryption key only, he/she can recover the original image.
